

Marine Imaging Workshop

7-10 April 2014

National Oceanography Centre
Southampton, UK

Imaging is increasingly used to assess the marine environment. Improvements in photographic equipment, devices for carrying cameras, and data have made the collection of high-quality underwater photographs an easy and useful way of capturing information. How do we get the best use of these data?

Themes

The emphasis of the workshop is on **methods** for:

- Image collection
 - Strategies and practicalities
- Processing of images
 - Including correction for colour, size, and camera position
- Still image/video annotation
- Annotation strategies for large data sets
 - Including automation and crowd sourcing
- Data management

Important Dates

2 December 2013	Registration with abstract submission open
17 January 2014	Abstract submission deadline
18 January 2014	Registration without abstract opens
7 February 2014	Abstract acceptances announced
14 February 2014	Registration and photo competition entry deadline
7-10 April 2014	Workshop

Photo Competition

Submit your best underwater photos to be judged for prizes!

Registration

The registration fee is £150, including the workshop dinner. Space is limited.
